DESCRIBE THE PRESENT AND ORIGINAL (If known) PHYSICAL APPEARANCE	
<p>It was constructed in 1886, as the corner stone indicated. The corner stone was evidently replaced when the building was installed on its present concrete block foundation. The foundation looks as though it was built in the first quarter of the 20th century. The building is a typical small chapel, three bays deep with a central entrance door. On the gable facade the walls are covered completely with aluminum siding. The covering probably covers up a Miter arch, because there is such an arch above the central door.</p>

STATEMENT OF SIGNIFICANCE

The entire structure has been so completely remodeled to render it difficult to interpret, except as a type of building that was being constructed in the latter part of the 19th century, for religious purposes. It is located in a grove of oak trees and across the street is a very large grave yard.

The building is important as a house of worship for the first district residents over the past 90 years.
